Skills

I'm a developer with 3 years of active experience and a total of 4 years dedicated to constant study. My passion for programming is driven by the relentless pursuit of continuous learning, as I recognize that technology is always evolving. I have a promising and exciting vision for the future working in this field that I deeply love.

Experience

SEPTEMBER 2024 - CURRENTLY WORKING

HIPE Innovation Center, Curitiba - PHP Developer

- Full-Stack Developer, focused on system maintenance and development of new features.
- Identification and resolution of critical bugs in legacy and new systems, prioritizing optimization and continuous improvement.
- Code refactoring to improve performance, readability, and scalability.

SEPTEMBER 2023 - JUNE 2024

Daju LTDA, Curitiba - Full Development Analyst

- Experienced professional in software development, with solid skills in programming, systems architecture and solution design.
- Responsible for analyzing project requirements, preparing technical specifications, developing high-quality applications and carrying out comprehensive tests.
- Active collaboration across cross-functional teams, contributing to successful project delivery and continually improving development practices.

JUNE 2022 - AUGUST 2023

Daju LTDA, Curitiba - Programming Assistant

- Dedicated collaborator on the development team, assisting in the creation, maintenance and optimization of web applications in PHP.
- Active contribution to code development, debugging and interaction with databases to ensure functional and high-performance web solutions.
- Efficient teamwork to achieve project goals and promote excellence in PHP web development.

Technical skills:

Front-end development

- JavaScript: 3 years of experience, focused on creating interactive interfaces.
- HTML/CSS: 3 years of experience, specialized in creating attractive and functional layouts.

- TypeScript: 1 year of increasing use in projects to ensure static typing, security and code maintenance, especially in conjunction with frameworks such as React.
- ReactJS: 1 year of experience in developing reactive components for building dynamic and responsive interfaces.
- VueJS: 6 months of experience, currently working with technology.
- Tailwind: 2 years of experience, and deepening knowledge with small projects.

Back-end development

- PHP (Object Orientation): 3 years of experience, capable of developing robust and scalable applications with an emphasis on object orientation principles and efficient use of PDO to interact with databases. Experience in creating REST APIs.
- Laravel (+7.x): 3 years of experience in creating APIs and private projects.
- Node: 1 year of experience in creating APIs and private projects.

Databases:

- MySQL: 3 years of solid experience in developing and administering MySQL databases, including data modeling, complex queries and performance optimization.
- PostgreSQL: 3 years of experience and proficiency in working with PostgreSQL, ranging from installation and configuration to the creation of advanced queries, stored procedures and functions, as well as knowledge of features such as replication and partitioning.
- SQLite: 1 year of study on small private projects.
- MongoDB: 6 months of study on small private projects.

Additional tools

- Bootstrap: 2 years of experience, I use it to create friendly and responsive interfaces.
- Docker: Proficiency in creating, deploying and managing containers, facilitating the development and distribution of applications.
- DataTables: Knowledge and application of libraries to deal with pivot tables.
- Semantic UI: 2 years of experience, applied to create elegant and intuitive designs.
- Insomnia and Postman: Proficient in using tools such as Insomnia and Postman for testing and documenting APIs, ensuring efficiency and quality in development.
- Notion: Advanced ability to use Notion as an organization and collaboration tool, optimizing project and documentation management.
- Jira: Solid experience in project management using Jira, facilitating team coordination and effective task tracking.
- Git: Advanced use of Git for versioning control, including branching and merging.
- knowledge of other agile methodologies.
- Figma: Experience effectively using the Figma platform for user interface (UI) design and team collaboration.

Design Patterns and Principles

- MVC (Model-View-Controller): Experience in creating applications following the MVC architecture, ensuring an efficient separation of concerns and facilitating code maintenance.
- DDD (Domain-Driven Design): Familiarity with the concepts and practices of Domain-Driven Design for software development based on domain models.
- SOLID: Deep understanding of software design principles, including:
 - Single Responsibility Principle (SRP)
 - Open/Closed Principle (OCP)
 - Liskov Substitution Principle (LSP)
 - Interface Segregation Principle (ISP)
 - Dependency Inversion Principle (DIP)
- Clean Code: Proficient in the practice of developing clean code, prioritizing readability, simplicity and good practices, promoting quality and ease of collaboration.
- Scrum Methodology: I work effectively within the Scrum structure and have knowledge of other agile methodologies.

Education

JANUARY 2021 - JUNE 2023

UNINTER, Curitiba - Completed

- Analysis and systems development
- English U-BEST - Intermediate

Languages

- **Português** - Fluent
- **English** - Intermediary
